Anurag Das

Saarbrücken, Germany | andas@mpi-inf.mpg.de | anurag-198.github.io

Research Profile

Final-year PhD candidate in computer vision and multimodal AI at the Max Planck Institute for Informatics, advised by Prof. Bernt Schiele. Research on vision-language model failure modes, test-time adaptation, and semantic segmentation. Experience training 7B-scale vision-language models at Samsung Research Cambridge.

Research Experience

Max Planck Institute for Informatics PhD Researcher, Computer Vision Oct 2021–present

- Investigated vision-language model failures in multi-image reasoning; first-authored a controlled analysis published in Findings of ACL 2026.
- Co-developed ClipTTT, a CLIP-guided test-time training method for large vision-language models.
- Developed MTA-CLIP for language-guided semantic segmentation (ECCV 2024) and a prototypical contrastive approach to weakly supervised domain adaptation (CVPR 2023).

Samsung Research Cambridge Research Intern, Future Interaction Group Jun–Nov 2025

- Ran large-scale training of a 7B LLaVA-OneVision model on 64 GPUs, using millions of single-image, multi-image, and video instruction samples.
- Analyzed model failure modes under visual corruptions and multi-image inputs, working with Brais Martinez and Adrian Bulat.

Max Planck Institute for Informatics Master's Thesis Researcher Oct 2020–Apr 2021

- Researched zero-label semantic segmentation under the supervision of Prof. Bernt Schiele.

Selected Publications

More Images, More Problems? A Controlled Analysis of VLM Failure Modes. **A. Das**, A. Bulat, A. Baldrati, I. Metaxas, B. Schiele, G. Tzimiropoulos, B. Martinez. *Findings of ACL, 2026*.

OneScene-Bench: Do Vision-Language Models Integrate Evidence Across Views? S. Suhas, **A. Das**, B. Schiele, J. Fischer. *NeurIPS VLM4RWD Workshop, 2026*.

ClipTTT: CLIP-Guided Test-Time Training Helps LVLMs See Better. M. Nath*, **A. Das***, J. Xie, B. Schiele. *Equal contribution. *arXiv preprint, 2026*.

Do Instance Priors Help Weakly Supervised Semantic Segmentation? **A. Das**, A. Kukleva, X. Hu, Y. Asano, B. Schiele. *TMLR, 2026*.

MTA-CLIP: Language-Guided Semantic Segmentation with Mask-Text Alignment. **A. Das**, X. Hu, L. Jiang, B. Schiele. *ECCV, 2024*.

Improving 2D Feature Representations by 3D-Aware Fine-Tuning. Y. Yue, **A. Das**, F. Engelmann, S. Tang, J. E. Lenssen. *ECCV, 2024*.

Weakly-Supervised Domain Adaptive Semantic Segmentation with Prototypical Contrastive Learning. **A. Das**, Y. Xian, D. Dai, B. Schiele. *CVPR, 2023*.

Urban Scene Semantic Segmentation with Low-cost Coarse Annotation. **A. Das**, Y. Xian, Y. He, Z. Akata, B. Schiele. *WACV, 2023*.

$(SP)^2$Net for Generalised Zero Label Semantic Segmentation. **A. Das**, Y. Xian, Y. He, B. Schiele, Z. Akata. *GCPR, 2021*.

Education

PhD in Computer Vision, Max Planck Institute for Informatics 2021–present
MSc in Computer Science, Saarland University GPA: 1.4 2019–2021
BTech in Information Technology, IIIT Allahabad GPA: 9.44/10 2013–2017

Additional Experience

Saarland University, Research Intern Modelling and Simulation Group Summer 2019
Qualcomm, Software Engineer Jul 2017–Mar 2019
Microsoft, Software Developer Intern Summer 2016
WorldQuant LLC, Student Quant Consultant Apr 2015–Apr 2016
IIT Bombay, Summer Intern Summer 2015

Teaching and Mentoring

Master's thesis supervision, Mriganka Nath (ClipTTT) 2026
Master's thesis supervision, Luisa Danalachi (Incremental Domain Adaptation) 2023
Master's thesis supervision, Nikhil Paliwal (Domain Adaptation with Temporal Cues) 2023
Teaching Assistant, Image Processing and Computer Vision, Saarland University 2020
Teaching Assistant, Introduction to Programming, IIIT Allahabad 2015

Academic Service

Reviewer: CVPR, ECCV, ICCV, NeurIPS, GCPR, TPAMI, IJCV, TMLR, IEEE-TCVST.

Technical Skills

PyTorch, Python, Hugging Face Transformers and Accelerate, CUDA, Slurm; distributed model training and evaluation; vision-language models, CLIP, and segmentation models.

Talks

Multi-Image Reasoning with LVLMs. *Google Research, Munich* 2026
Weakly Supervised Domain Adaptation. *ICVSS, Sicily* 2023
Weakly Supervised Domain Adaptation. *GCPR, Heidelberg* 2023
Urban Scene Semantic Segmentation with Coarse Annotation. *TRACE, Leuven* 2022
Generalised Zero-shot Semantic Segmentation with Superpixels. *GCPR* 2021

Scholarships, Achievements and Awards

Best Master's Thesis Award in Germany, GCPR 2021
Saarland Stipendium, funded by DAAD 2021
Saarbrücken Graduate School of Computer Science Scholarship 2019
Three Qualstars at Qualcomm India 2018
Ranked 6th of 185 students in Information Technology, IIIT Allahabad 2018
Institute Merit Scholarship, IIIT Allahabad (top 5% of class) 2017
43rd in Asia, WorldQuant Websim Challenge 2014
DST INSPIRE Scholarship (top 1% in CBSE Board) 2012
Qualified for Indian National Mathematics Olympiad 2011
